INVESTMENT DIE CASTING DIES

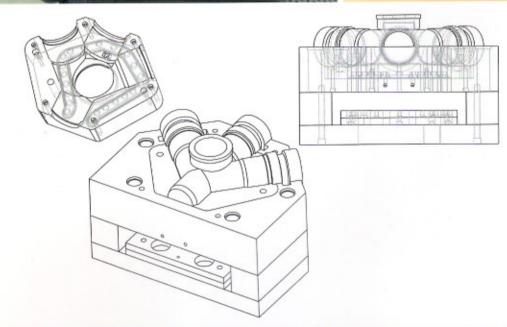

WE ALSO UNDERTAKE JOB WORKS ON CNC MILLING, CNC LATHE AND WIRE EDM

" QUALITY IS NEVER AN ACCIDENT, IT IS A RESULT OF TEAM EFFORT "

Designing

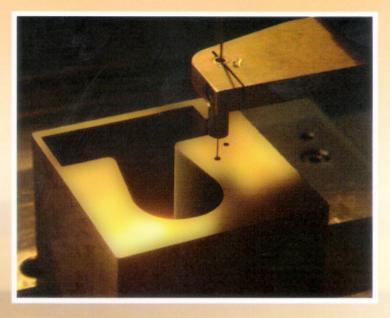

DESIGNING.

We design all the moulds at our end. The software which we are using for designing the moulds includes CAD-CAM and also for analysis for the same we use mould flow.

We have well qualified and experienced design team. Which has the ability of converting proto images to realistic moulds. This is one of our strongest part where the beginning of every mould starts.

High End Machines

We have all size of machines from small to big with Spindle speed upto 25,000 rpm & feed rate programmable upto 10 metres. We have 5 CNC Vertical Milling Machining Centre, varying from 700 mm to 3000 mm in "X" axis, 400 mm to 2000 mm in "Y" axis, 450 mm to 1000 mm in "Z" axis, 2 Orbit Cut with "Z" NC EDM, 3 Wire EDM & Turning Centre.

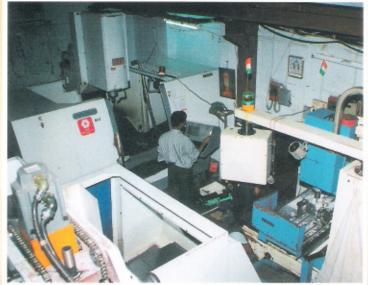

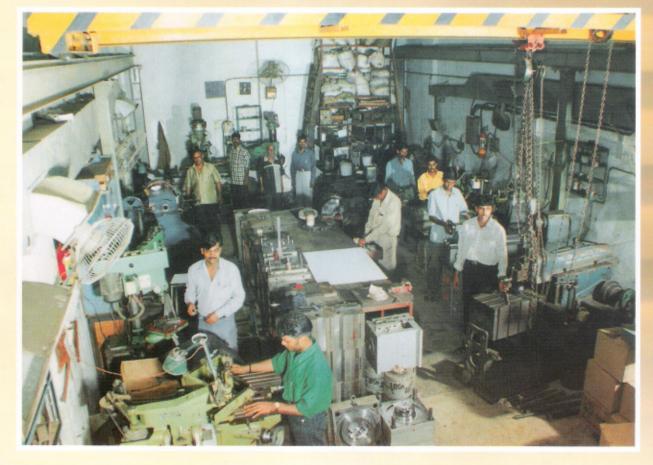

Shop Floor

Our Shop Floor is equipped with heavy duty cranes on all the areas of the tool room. Which avoids unsafe conditions and gives an advantage over unwanted wastage of non value added time. We have separate die maker tables for a group of die makers. Which lessens the confusion between two identical or different moulds.
